01/2018 ALL RIGHTS RESERVED. Technical changes possible. No liability for misprints.R1

All installation work must be performed by a qualified professional installer only.
The manufacturer / dealer is not liable for any kind of incidental or indirect damages.

Take out the OEM interface and unplug the connector.

Open the front plastic cover and remove the original PCB. Save the white plastic after removing the PCB.

Take the new PCB in the white plastic and place it into the black cover.

Put and fix the front plastic cover

Take the supplied harness and plug the connector. Connect the AUX and the USB plugs to the head unit. Connect the Black wire to the GND and the Orange wire to ACC +15 signal wire or head lights signal wire. Check the proper functioning of the system and the illumination. Remount the panel on the dashboard.
